

Cleaver Coffee

Ingredients:

Cleavers Fruits – as many as you can pick

Method:

Having picked your fruits, roast them either in the oven or cook them gently in a saucepan over a low heat.

When cooked, crush them with a pestle and mortar or something similar. They will become like powdered coffee.

Then make your coffee!

There are plenty of videos online showing how to do this, you can also of course add sugar, ginger, honey or other ingredients to your coffee to make it more tasty.
